Sub: Licence upgradation of Huawei Node Bs reg:-

Sir,

We invite your kind attention to the above subject.

After the latest version upgrade done by M/S Huawei High speed 21.1 Mbps 3G data (HSDPA+) feature has been provided in the Huawei RNCs. Through put license of the RNCs are also increased considerably by this upgrade. During the testing period, the Node Bs in Huawei 408 RNC were supporting the HSDPA+ feature and through put of the Node Bs increased considerably. But when the original license was provided by Huawei in Node Bs after the upgrade, the HSDPA+ features is not available and the maximum through put is reduced to H 14.4 Mbps (HSDPA only). Many of the Node Bs in Huawei RNC area are capable to come under the VHT data traffic category if the HSDPA+ feature is made available .There are 949 Huawei Node Bs are radiating in Huawei area at present out of which only 62 are VHT sites. So kindly take necessary action to enable the HSDPA+ feature in Huawei Node Bs at the earliest

With kind regards,

Sincerely Yours

**T SanthoshKumar
